

Creative Thinkers

Raider 2021

Whether we were online or in school we had to be creative not only in our electives like art and drama but also in classes like English and History.

“Some of the ways to be creative is to come out of your comfort zone, like I did when I tried Japanese for the first time.” Blank said.

Students can participate in so many different spectacular electives.

If I could only pick two my favorite electives would be Band and Broadcasting, we get to have fun and learn helpful skills for the future, we also can be creative and use our imagination.
